

DUGARD Machine Tools

Dugard and Oryx Engineering Solutions, a Powerful Team

Described as the pioneer of private sector investment in Qatar's massive upstream services sector recently (Oil & Gas Middle East), Abdulla Mannai of Oryx Engineering Solutions is riding high in the popularity stakes right now. Rightly so, Qatar is after all one of the fastest growing economies in the world and as the Founder and MD of Qatar's largest integrated engineering services operation, the accolade is well deserved.

A Selection of Dugard Machines at Oryx

**You Ji
Vertical Borer**

**Tos Varnsdorf
Horizontal Borer**

**Dugard
Large Capacity Lathe**

When Abdulla Mannai was looking for such world class solutions, Dugard happily stepped in as one of their major suppliers. We've been working closely with him for some time and have supplied Oryx with an impressive machining facility – including a TOS Varnsdorf Horizontal Borer, 2 x You Ji Vertical Borers and a number of Dugard large capacity lathes.

As a result, Oryx now have a 14,700m² facility, uniquely designed to meet the needs of their customers, for large-scale industrial maintenance, service and asset management of large-scale equipment.

It's a business relationship we're very proud of, and one that is working very well for us. For more information on Oryx Engineering Solutions, go to their website:

www.oes.com.qa

and you can see the full article on Abdulla Mannai here at the Arabian Oil and Gas website:

www.arabianoilandgas.com

If you have any requirements for large capacity machines, or machines for a specific industry call us on 01273 732286 to discuss what we can do for you, or email us sales@dugard.co.uk

As they point out on their website:

“Oryx Engineering Solutions is a progressive, modern and newly established integrated engineering services solution provider located in Ras Laffan Industrial City, Qatar to support the rapidly changing, evolving and demanding needs of the Middle East and Africa's energy sectors: oil and gas, power and water, petrochemical, industrial and marine.

Our technical excellence and ability to deliver integrated 360° quality engineering solutions from design, reverse engineering, re-rating and repairs, means we can make your life simpler.”
