SL 2000 series (A Type: 6", B Type: 8")

SL 2000(A/B Type), SL 2000M(A/B Type)

Strongest in class with superb structural design
 Simultaneous heavy duty and precision turning

- 45 degree torque tube type bed to support heavy duty turning
- Significantly reduced non-cutting time and efficient turning
- SERVO TURRET for performance improvement
- Low-center of gravity reducing vibration, thermal deformation and improving rigidity

High Accuracy, High Rigidity Spindle

Head assembly with radiator fan to minimize thermal expansion

The radiator fan structure of head assembly minimizes thermal expansion of the spindle, preventing loss of precision due to increasing temperature. Also, thermal expansion is minimized with the symmetric design.

BZi sensor used to reduce field servicing needs

changing spindle orientation sensor from position encoder to Bzi sensor, there is no need for timing belt and we have realized high accuracy of rotation sensor, eliminating field service.

SPINDLE & HEADSTOCK

The Spindle and Headstock are machined in temperature controlled environment and assembled in a clean room.

Precision double row cylindrical roller bearings and angular contact ball bearings are located at the front of the spindle, and a double row of cylindrical roller bearings is located in the rear to ensure heavy cutting capabilities with precision.

High Speed, Servo Index Turret

Indexing Time

0.15sec (60Hz)

Number of tool positions

12stations

Non-Cutting Time Significantly Reduced with Installation of High Speed Turret with 0.15 Sec Indexing Time

A 0.15 second 1 station indexing time is made possible by employing the Nonstop Random Index method using the SMEC developed high-power Servo Index Motor. The Ø 160mm large diameter Curvic Coupling significantly improves the clamping power and indexing precision.

SL 2000M

High Speed Servo Turret (Tool Holder BMT55)

SL 2000M is equipped with standard 12-station BMT55 turret capable of accepting rotary tools at any station, providing flexible machining thru various machining operations in just one set-up. Each BMT holder is securely tightened by 4 screws, allowing the turret to perform heavy-duty cutting, milling and drilling operations. Turret indexing is non-stop, bi-directional with a fast 0.20 second next station index time.

Easier HYD Valve Control

The gauge and control valve for HYD valve is raised to the operator's eye level making maintenance easier.

Easier Coolant Tank Cleaning

Cleaning the coolant tank is made easier with a coolant tank that can be removed while leaving the chip conveyor bolted to the machine.

SL 2000 series

6" - 8" Horizontal Turning center

Centralized Operation Panel

The centralized operation panel with its 10.4 inch color TFT LCD monitor [Opt.] is able to swivel 90 degrees, providing operators with easy access to the control panel while working on the machine.

Rigid 45 degree Slant Bed

45 degree slant torque tube design bed and wide guide slide way ensure long term rigidity and machining accuracy.

Also, Slant Bed type provides excellent chip disposal and user access to workpiece.

Programmable Tailstock

The tailstock that maintains superb high precision during heavy duty cutting can be manually traversed using the MPG handle. Also, With programmable tailstock(opt.), the tailstock and quill may be operated back and forth automatically using M-codes.

Pre-tensioned and Double Anchored Ballscrews

All axes ballscrews are pre-tensioned, heat treated and fixed by double anchors on both ends, providing ultimate rigidity and minimal thermal growth.

Hexahedral Slide Way Frame (X-axis)

Wide integral way is machined from the casting, induction hardened and precision ground to ensure long-term rigidity, machining accuracy and heavy-duty machining.
